Report on DTA Collaboration and Activities

D1.2

EDIH ADRIA

EDIH Adria – EUROPEAN DIGITAL INNOVATION HUB ADRIA – Digital Transformation of Adriatic Croatia
Grant agreement: 101083838
Project Duration: 01/01/2023 to 31/12/2025

DELIVERABLE FACTSHEET

Deliverable No	D1.2
Deliverable name	Report on DTA Collaboration and Activities
Lead Beneficiary	STEP RI
Type	R – report, document
Dissemination Level	PU – public
Work package No	1
Work Package Leader	UNIRI
Task	1.3
Due date	31/12/2025
Actual date of submission	11/12/2025
Version	2.1
Authors	Boris Golob, Sara Tikel, Mario Vukelić, Aleksandra Borjanić
Contributors	Damir Medved, Tanja Pavlović Flegar, Emira Brkić Karninčić, Gordan Krčelić, Kristian Stančin, Danijela Jakšić
Reviewers	Tamara Grubiša, Saša Zelenika

1. Introduction

The DTA (Digital Transformation Accelerator) is a project that aims to support the creation, development, and growth of the pan-European DIH network, facilitate intra- and inter-regional collaboration between European Digital Innovation Hubs (EDIHs), build up the digital capacity of EDIHs through hand-picked training sessions, and provide guidance and advisory support.

The DTA serves as an effective intermediary/interface between DG CONNECT and the network of EDIHs.

As stated on the EDIH Network webpage, the DTA services include the following:

- EDIH Network Online Platform (Digital Maturity Assessment Tool, KPI Tool, My EDIH space, EDIH mini-site, EDIH Catalogue, Guidance documents, EDIH Academy (training courses))
- DTA Helpdesk
- Social media and communication activity
- EDIH Network Annual Summit
- Working Groups and matchmaking events
- Events and webinars

Our consortium actively utilizes all the services provided by the DTA.

This deliverable contains information on the DTA collaborations and activities the consortium's partners participated in, as well as information on the KPI data tracking process. The information about participation in DTA activities was gathered from all partners using an online tool, specifically MS Outlook.

European Digital Innovation Hubs Network
Co-funded by the European Union
REPUBLIKA HRVATSKA MINISTARSTVO GOSPODARSTVA
Projekt je temeljem Ugovora o dodjeli bespovratnih sredstava br. 101083838, sufinanciran od strane Europske unije iz programa Digitalna Europa (DIGITAL) te iz Državnog proračuna Republike Hrvatske

2. EDIH Network online platform

The EDIH Network online platform offers a range of tools, including the Digital Maturity Assessment (DMA) Tool, My EDIH Space, EDIH Mini-Site, EDIH Catalogue, Guidance Documents, EDIH Academy (training courses), and KPI Tool.

The usage of the DMA Tool is elaborated in detail in the D4.1 Digital Maturity Assessment Report. Each consortium member utilizes the DMA Tool to collect data from our users – SMEs and PI – on their digital maturity. This assessment is conducted before receiving EDIH Adria's services (DMA0), one year after the initial service (DMA1), and three years after the first service (DMA2). In summary, the DMA Tool is employed three times for each service provided by an EDIH, enabling us to monitor and measure the progress in digital maturity for every recipient of the EDIH support services.

The online platform also provides the "My EDIH" space, a tool that the consortium uses to access and manage data related to EDIH Adria, including DMA overviews and results, performance indicators, EDIH users, and more.

Through our project's mini-site (https://edihadria.eu/), we enhance our visibility. The EDIH Catalogue facilitates collaboration with other European Digital Innovation Hubs (EDIHs). Additionally, we rely on EDIH Guidance Documents for operational support, while the EDIH Academy equips our team with training and learning resources.

EDIH Adria actively develops and shares success stories and best practices on the EDIH Network Online Platform. These stories showcase examples of users who have successfully undergone digital transformation through our services. By demonstrating the effective use of available tools and impactful results, these stories attract new users and foster knowledge exchange across the network. Additionally, EDIH Adria draws inspiration and identifies potential collaborations by learning from the good practices shared by other EDIHs.

EDIH Adria also participates in the EDIH network badges programme, using the badges received to communicate and showcase our activities and key achievements.

2.1. KPI data tracking

The KPI Tool is part of the EDIH Online Platform, allowing EDIHs to report on the services provided to their customers (SMEs and PIs).

At the start of the project, EDIH Adria's Project Coordinator filled in the expected KPIs for each year. Since then, the KPI Tool has been used to report on delivered services, including Test Before Invest, Training and Skills Development, and Support to Find Investment.

EDIH European Digital Innovation Hubs Network
Co-funded by the European Union
REPUBLIKA HRVATSKA MINISTARSTVO GOSPODARSTVA
Projekt je temeljem Ugovora o dodjeli bespovratnih sredstava br. 101083838, sufinanciran od strane Europske unije iz programa Digitalna Europa (DIGITAL) te iz Državnog proračuna Republike Hrvatske

The KPI Tool provides raw data in CSV format, which is utilized to capture data for EDIH Adria's internal KPI platform. This platform enables automated data collection and processing, data visualization, report creation, and KPI monitoring. The functionalities of the EDIH Adria KPI platform are described in detail in the D1.1 EDIH Adria Impact Report.

In summary, the KPI Tool is used to track progress, ensure accountability, identify and resolve issues, make adjustments as needed, and support informed decision-making.

3. Event participation

DTA services include event organization, such as the EDIH Network Annual Summit, Working Groups, matchmaking events, and webinars.

This section presents the consortium's participation in these events, categorized into support activities and the Train the Trainer programme. The consortium actively engages in DTA events to foster concrete cooperation opportunities with other EDIHs, promote knowledge sharing, and strengthen internal competencies within EDIHs.

3.1. Participation in support activities (matchmaking, training, capacity-building events)

The table below provides data on participation in support activities, including matchmaking, training, and capacity-building events.

4. Other DTA activities

As mentioned in the Introduction, the DTA services also include the DTA Helpdesk and the Social media and communication activities section.

The Project Coordinator utilizes the DTA Helpdesk as an on-demand support resource for addressing legal and operational issues related to capacity-building, financing, matchmaking, and collaboration.

EDIH Adria regularly shares and promotes EDIH network content through its official media channels, acting as a communication bridge between the DTA and EDIH end users. For instance, we actively encourage our users to participate in surveys conducted by the DTA and to fully utilize the services offered by the DTA to SMEs and PIs.

5. Results and conclusions

Within the EDIH Network's Digital Transformation Accelerator, the project partners were involved in diverse activities, ranging from webinars and working groups to targeted trainings. This participation helped strengthen the digital capabilities of the EDIH Adria consortium and equip the partners with the knowledge necessary for carrying out project activities.

The key results of these participations are the following:

- The consortium's involvement in the "Train the Trainer" programme provided a foundation for being able to work with the project users on projects covering critical digital innovation and transformation topics (such as cybersecurity, IoT, and AI).
- By participating in DTA-organized support activities like matchmaking events and webinars, the consortium showed alignment with EDIH Network's objectives and support of the Network's standards and goals.
- Two of our consortium members are part of two separate Working Groups, with each member participating in one group. These groups bring together EDIHs with similar goals and strengths or a shared focus on certain sectors or technologies. By taking part, our members help exchange good practices, share lessons learned, and explore new project ideas.
- The consortium gained great resources for staying up-to-date with always-changing digitalization trends. This will help the consortium expand its knowledge and proficiency in digital transformation and digital innovation processes. The consortium members recognized the importance of expanding knowledge on emerging technologies.

The collaboration with the DTA has fostered an uplift in the digital capabilities of the consortium, positioning it as more digitally advanced and innovation-ready. The DTA activities have broadened participants' digital skillsets and paved the way for establishing valuable cross-European connections that will benefit future phases of the EDIH Network initiative.

6. Implementation challenges

One challenge faced during the DTA events was the reliance on the online format for most activities. While this approach was very accessible and convenient, it limited opportunities for engagement and interactive discussions. Networking, which is often more effective in face-to-face settings, was also impacted. As a result, the exchange of best practices and the development of connections were not as effective as they might have been in a live environment.

The DTA platform was introduced two months after the project started, which meant that participants experienced a slight delay in accessing essential resources and tools. While this did not prevent engagement, it required some adjustments and patience as the platform became fully operational.

A commendable aspect of the implementation challenges is that DTA services are continuously improved throughout the project's duration based on feedback and suggestions from EDIHs. For example, the work of Working Groups (WGs) and KPI tracking has been simplified and adapted to meet identified needs.

EDIH Adria, in collaboration with other EDIHs, actively proposes additional changes to DTA tools, primarily aimed at ensuring even more successful implementation of EDIH 2.0.
